

# Valley of the Sun

## Before & After School and Preschool Child Care

- character development** Caring, Honesty, Respect, and Responsibility are the core values upon which all YMCA activities are based.
- health & well-being** Activities involve exercise and constructive play. Healthy snacks are provided as we continually reinforce the importance of good eating habits.
- homework support** We have a strong commitment to helping your child complete homework by providing time, space, and support.
- literature & literacy** Our program, KidzLit, gets children excited about reading, encourages self-expression, and enhances critical thinking.
- arts & humanities** Cultural arts play an all-important role in child development. Creativity is encouraged through drama, music, and the arts.
- science & technology** Age appropriate science activities inspire and assist in the development of problem-solving skills, helping children relate to the everyday world around them.
- socialization** The development of good social skills is critical to a child's successful path to adulthood. Proper social behavior, conflict resolution, and solid self-esteem are just a few of the many attributes our program strives to instill.
- service learning** We teach leadership and the importance of caring and respecting others.

Fun for them...peace of mind for you.
